

StarCloud+

Where The Best Of Cloud & On-Premises Meet

The StarCloud+ platform combines the best of two communications worlds, leveraging Star2Star's innovative Cloud Architecture. StarCloud+ ensures unparalleled scalability, flexibility, and reliability.

Innovative, Ultra-Reliable Communications

Star2Star pioneered their unique cloud architecture which combines the flexibility of the cloud with the reliability of an on-premise communications solution. Built upon this foundation, StarCloud+ leverages the on-premises StarBox[®] Voice Optimized SD-WAN and cloud-based Constellation[™] Network to provide 99.999% uptime, built-in business continuity, and voice-optimized call routing and controls for end-to-end communications support.

Explore StarCloud+

Leverage the power of innovation and ultra-reliable communications.

Unique Cloud Architecture

StarCloud+ leverages our exclusive, pioneering cloud architecture technology which combines the best of cloud-based and on-premises systems. The StarBox[®] Voice Optimized SD-WAN and Constellation[™] Network work together to provide the most reliable Unified Communications on the market.

StarBox[®] Voice Optimized SD-WAN

As the on-premise component of StarCloud+, the StarBox[®] manages the traffic flow of your communications. It provides crystal clear call quality, real-time network adaptation, and continuous monitoring services for communications with no delay, echo, distortion, or downtime.

Constellation[™] Network

The Constellation[™] Network serves as the cloud-based component of StarCloud+. All of your communications are dispatched along the best possible path through this network of call routing nodes and secure data centers. Not only will your communications be fast and high-quality, they will also be continuously optimized in the event of network issues.

Multi-Location Flexibility

The StarCloud+ solution is designed to optimize your operations from one location to several. All phones are connected and operate as a single system allowing for direct extension dialing, seamless call transfers, ring groups, call queues, and more.

End-To-End Business Continuity

StarCloud+ stands out as the most reliable Unified Communications system available on the market. This system leverages built-in network monitoring, disaster avoidance, and recovery features that prevent your communications from experiencing lags, jitter, or failure with 99.999% uptime guaranteed.

Advanced Unified Communications Features

Our StarCloud+ platform is known for being one of the world's most complete UC systems on the market as part of our Full Spectrum Communications Solution. StarCloud+ comes with built-in advanced features that would be charged as an add-on with other systems. Our advanced features suite includes:

- Advanced Call Center
- Analog Device Support
- Call Recording
- Call Transfer, Park, Intercom, & Paging
- Custom Music / Message On Hold (MOH)
- Extension User Rights
- Faxing & Mobile Faxing
- Find-Me / Follow-Me Call Forwarding
- Flexible Call Routing
- HD Voice Call Clarity
- Instant Messaging
- Line Pooling & Bursting
- Multi-Layer Cloud Auto Attendant
- Multi-Location Ring Groups
- Paging & Group Paging
- Presence Management
- Reporting & Analytics
- Softphone & Home Office Extensions
- Time-Based Call Routing
- Unlimited Conference Calling
- Unlimited Voicemail
- Video Conferencing
- Voicemail Groups
- Voicemail-To-Email
- Web-Based User Administration
